24 August 1994

To Whom It May Concern:

George Skokos has been employed as a consultant with the North Warning System Operation (NWSO) from the 27 June 1994 to 2 September 1994 as a Network Specialist. He was contracted specifically to plan, implement and conduct training in the BeyondMail e-mail application as well as to provide complete documentation on the Server Load Balancing Project. Although his full range of skills were not required, they proved to be a valuable asset when called upon.

George conducts himself in a professional and pleasant manner, and I would not hesitate to recommend him.

Sincerely,

LtCol GW Howard (USAF)
(613) 996 2250
